

OUTLOOK  
GARDENS  
EXCELLENCE BY DESIGN

## ABOUT US

We are a professional garden design, build and maintenance company founded by Dermot Kerins, who has project managed and built outstanding award winning gardens throughout Ireland, the UK and Europe for over 20 years including two medal winning gardens at the Chelsea Flower Show (Gold and Silver-Gilt).

Whether you are looking for a low-maintenance garden or a bespoke outdoor space to entertain family and friends, Outlook Gardens can help.

We take pride and joy in creating, building and maintaining outstanding living spaces. Our objective is to enhance the lives and environments of our customers in a professional, friendly, timely and reliable way.

Our goal is to deliver your dream outdoor living space and we provide the following services (individually or as part of the overall package)

- Consultation
- Design
- Quantity Surveying / Estimating
- Build
- Plant Supply
- Project Management
- Maintenance and Aftercare

**OUR MISSION IS TO  
IMPROVE PEOPLE'S  
LIVES BY IMPROVING  
THEIR ENVIRONMENT**

## CONSULTATION SERVICE

---

We will visit your garden for an initial on-site consultation to establish your brief and discuss ideas that will form the basis of the design. We follow this up with a written report outlining recommendations, with a quotation for the design package.

# OUR PROCESS

STEP 1

## CONSULTATION

Establish brief & discuss ideas.

Followed up with a written report of recommendations and a quotation.

{ A consultation fee of €250 is payable on first visit. }

STEP 2

## DESIGN

1. Survey/Assessment
2. Outline Design
3. Final Site Layout
4. Quantities/ Specifications
5. Planting Plan

.....  
All stages are available as individual options or as part of the overall design package.  
.....

STEP 3

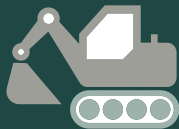

## QUANTITY SURVEYING/ ESTIMATION

Bill of Quantities (BOQ) and Tender Documents.

.....  
Cost estimates at various stages to facilitate budget planning.

# OUR PROCESS

STEP  
4

## BUILD

Supplying all the labour, materials and supervision to complete the works to the highest approved standards.

## PLANT SUPPLY

We create a specific planting scheme to suit the growing conditions of your garden, complement the design and create the overall ambiance for the project.

## PROJECT MANAGEMENT

Complete project management where we oversee the project from start to finish on your behalf and ensure that your garden is delivered exactly as planned.

STEP  
5

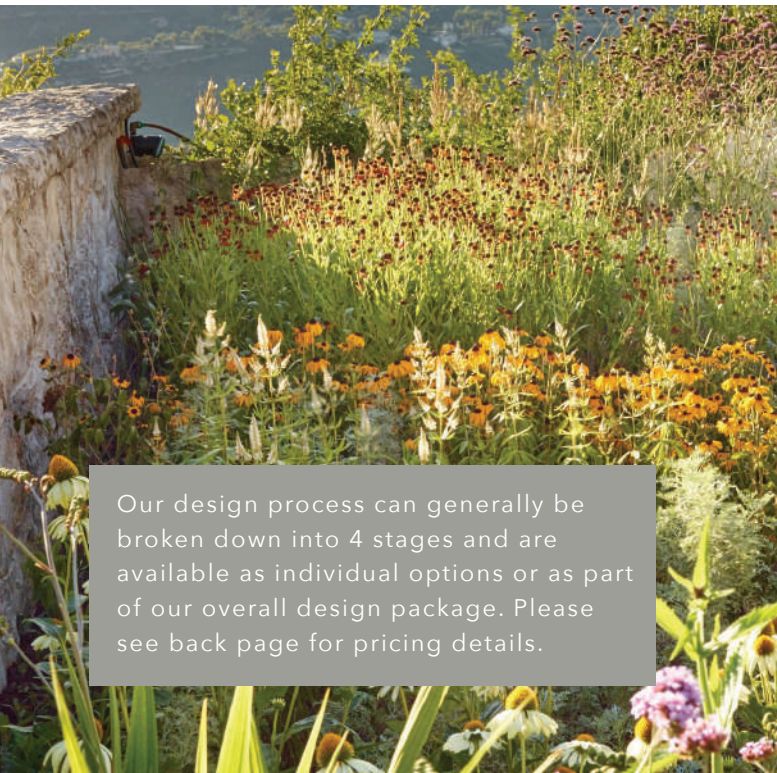

## MAINTENANCE

We specialise in a wide range of gardening and grounds maintenance services in both commercial and domestic setting.

# DESIGN SERVICE

---

Our design process can generally be broken down into 4 stages and are available as individual options or as part of our overall design package. Please see back page for pricing details.

## SITE LAYOUT // CONCEPT

### Site Survey/Assessment

---

We conduct a physical and biological survey that will provide us with a detailed, accurate, scaled layout plan of the existing landscape. A topographical survey may also be required depending on the situation.

### Outline Design

---

We create a concept drawing that is presented prior to completing the design, explaining the concept and overall feel for the garden and showing the areas of hard landscaping, planting, and features.

**THOSE WHO FAIL  
TO PLAN ARE  
PLANNING TO FAIL**

## SITE LAYOUT // PLAN FINAL

### Final Site Layout Plan

---

The drawings, including elevations and cross sections, are then worked to scale and the final layout plan for the garden that will show the definitive position of the main features is created.

## SITE LAYOUT // DETAILS

### Quantities and Specifications

---

We provide a specification document outlining the precise work to be undertaken including the construction methods and materials to be used.

## SITE LAYOUT // PLANTING PLAN

We create a plant list that includes a record of botanical names and detailed planting plans if required.

Price ranges for the individual options and the overall design package are list on the following page.

Over the years we have created many wonderful, innovative, functional gardens and landscapes; from small creative designs in suburban Dublin, to much larger complex projects in the UK and France.
